In the fall of 1996, Judy Talaba, R.N. and myself brain mapped (QEEG) an individual with a Masters Degree in Counseling, during a meditation session conducted by Richard Leigon. The test results indicated that Mr. Leigon is assisting the balancing of hemispheres in the brain, and equally important, the opening of higher, more intuitive and spiritual types of frequencies. We are looking forward to conducting further research on the effects this man has. What we have seen so far has been very positive and quite amazing.
